OCTOBER 19-21, 2016

**INTERSOLAR INDIA & SKILL
COUNCIL FOR GREEN JOBS
JOINTLY PRESENTS**

SKILL GAP IN SOLAR

21st October 2016

10.30 am – 12.30 pm
Hall 1, Auditorium 2

The Solar industry is opening a completely new avenue for absorption of our youth in all sectors of manufacturing, project development and services, which would be a long-term requirement in the solar domain. It is estimated that there would be a requirement of 10.00 Lakh skilled manpower by 2025. We can visibly see that the manufacturing in solar domain would pick up. In order to address the manpower requirement in Renewable Energy, in general, and Solar Energy, in particular, Ministry of Skill Development and Entrepreneurship has set up a new Sector Skill Council for Green Jobs. The session would discuss the requirement of skilled manpower in the sector and roadmap prepared by Skill Council for Green Jobs in manufacturing, project development and operation & maintenance".
